

Hello- I am so tired of the excessive spending with this Governor -Governor Dannel Malloy. He has pushed us to the bottom of the states in spending and that is not something that will make this state for anybody to want to retire in.

We need the Republicans in the state to stand up and fight this spending. We have 3 representatives from Bristol and I expect to have all of you going after this spending.

I have come up with a few ways to cut the budget and a big one is to take cars away from everyone that drives one to and from work and does not get called out for duty at night or weekends. You could check out this by their mileage and their time sheets. This should pertain to all of these people who drive a state car.

Instead of buying supplies from Staples you could have a person do it once a month and save by them picking up the supplies.

You need to get rid of middle management in the fact that you have too many managers. Look at how many each of these managers has under him and you will be surprised that some have only 1 or 2 people.

Another way to judge the employees is to find out how much output these people do. I know for a fact that there are people who sit there and do nothing hardly during the day and get overtime pay on Saturday to get caught up in their work.

There are more ways if you are creative to find ways to save money. But no MONEY for the move for the baseball team to Hartford. The stadium was in a great place in New Britain with not a lot of expense. The whole deal was done in private and the states people should be upset with this government in the State of Connecticut. People are leaving this state and I might be one of them. It is too expensive for a retired person to survive.

Carol Sisson
